

## Plug and Play GPS tracking and notification system for Ducati

### Installation:

- Locate the factory Ducati alarm plug on your bike.
  - The factory alarm plug can be found under left side front fairing cover below the left side handlebar, see image of factory plug below.
  - The factory alarm plug is affixed below the fairing on an inner fairing, with an adhesive zip-tie holder. Lifting up on the connector firmly, will free the adhesive.

- Remove the factory dust cap.
- Plug in the harness from the GPS.
- Securely mount the GPS with the provided adhesive, label side down. Secure any loose cables with supplied cable ties.
- Scan the QR code on the box or below for guided instructions on downloading the app and getting started.
